

This idea of limiting/eliminating the XM satellite radio system is absurd!!! What ever happened to the 1st amendment?? And advancement in techhnology?? Isn't the USA supposed to be among the leaderas in technology?? There is this thing that the USA is based on, called the Constitution of the United States of America. Ever heard of it?? Or what country did you get your education at before arriving to America to take on a "governing" position?? So XM radio is quite entertaining.... FM radio...?? Boring!! Could have been spiced up long long ago. And the vulgar language and topics used by shock jocks and morning moron zoos... GET RID OF THEM!!!!!!! I've yet to hear a vulgar word on any XM station except the ones that be designated as being so. My children don't get hammered with "surprises"!! And they have so much more variety of music, etc. Not the same repeat...repeat...repeat... what THEY tell you what you will hear!! You want to know my feelings?? This is just a few topic headers. Leave the XM radio issue alone. If the FCC is bored and want a bit of attention, then go crack down on a whole bunch of my fellow truck drivers. The way they carry on over the CB radio is intolerable. That's why I got my XM radio and have been driving in "heaven" ever since. My name is Harry Keller, and I strongly oppose act HR 4026!!!!!!!!!!!!
